ASSEMBLAGE

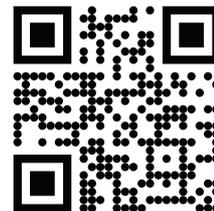

OFFGRID & OBJ.STUDIO PRESENT

Audiovisual Exhibition

saasfee*pavillon

17.03.23-07.04.23

In *Assemblage*, both visual and sonic works of more than 25 international artists come together in an immersive multimedia installation. Seamlessly, they are brought together by the artificial intelligence based musical software bronze.ai to form one large work that is constantly in flux. The collectives offgrid and OBJ.Studio have jointly developed, curated and designed *Assemblage* to create an alternative exhibition format for time-based art in which the form is generated, rather than dictated.
